

## **All locations in the overview**

- Targeted use of our metering solution for visualization and analysis
- Mapping of all consumption and industrial premises
- Central data provision in the form of uniform formats
- Efficiencies and savings from which the whole organization benefits
- Acteno energy as an independent contact for
  - All relevant energy data
  - The support for energy efficiency measures
  - The Regulatory Compliance

## **Analysis and Monitoring**

With easy-to-use analysis options you will see the energy quality of sites and reduce their own administrative effort. The Acteno energy performance management brings the data with their business-related key figures in Table:

- Load profile analysis
- Base load analysis
- Analysis of the After tab sink: Identify and turn off unnecessary consumers outside of the opening hours
- Alerts: Monitoring of thresholds and notification in the event of deviations via email and SMS
- Time Series Analysis: fuel consumption at a glance: date and period sharp determination of fuel consumption
- Performance Analysis: benchmarking and comparison of sites
- Export of reports and measurement data
- Site-based comparison of the data streams (for example, in terms of square footage, the number of persons employed, etc.)
- Energy efficiency measures: Planning, controlling, monitoring, document
